## RELEVANT PROJECTS

### Portfolio Website (11/2024 - 12/2024) [🔗](#)

- ◇ Create a responsive portfolio website from scratch using HTML, CSS, JavaScript, and jQuery.
- ◇ Built website structure based on low-fidelity wireframes, utilizing HTML for the layout, CSS for design, and JavaScript for added functionality. Incorporated jQuery for a toggle menu to enhance user navigation.
- ◇ Delivered a fully responsive portfolio website showcasing the designer's work, with clear sections for projects, about, and contact, providing a seamless user experience.

### "Hakunetsu Studios" Responsive Web-App (09/2024 - 10/2024) [🔗](#)

- ◇ Design a responsive web application for an e-commerce store based on user stories.
- ◇ Conducted competitive analysis, created low-fidelity sketches and user flows to map the user journey. Developed mid-fidelity wireframes and performed usability tests. Applied feedback to refine and produce high-fidelity wireframes.
- ◇ Delivered a visually appealing and user-friendly e-commerce store that aligned with user stories and provided an optimized shopping experience.

### "Via Eurasia" Redesign - Using Figma (09/2024 - 09/2024)

- ◇ Redesign mobile app screens to improve user experience based on feedback from user testing.
- ◇ Analyzed user feedback, created a list of user needs, and identified key features to add or remove. Researched modern design trends and streamlined the interface to reduce screen interactions by combining functions and information.
- ◇ Delivered a sleek, modernized app design that enhanced functionality and user clarity, reducing confusion and improving the overall user experience.
